GALAXY SII SKYROCKET

**INFRINGEMENT CLAIM CHART FOR U.S. PATENT NO. 8,014,760
REDACTED**

HIGHLY CONFIDENTIAL – OUTSIDE ATTORNEYS’ EYES ONLY – SOURCE CODE

Infringement Claim Chart for U.S. Patent No. 8,014,760

Claim 10 of U.S. Patent No. 8,014,760	Samsung Galaxy S II Skyrocket Phones
<p>A portable electronic device with a touch screen display, comprising¹:</p>	<p>To the extent that the preamble may be construed to be limiting, the Samsung Galaxy S II Skyrocket phone is a portable electronic device with a touch screen display. For example, the Samsung Galaxy S II Skyrocket is an Android smartphone with a 4.52” Super AMOLED Plus touch screen display. (See Samsung Galaxy S II Skyrocket specifications, http://www.samsung.com/us/mobile/cell-phones/SGH-I727MSAATT-specs).</p> 

¹ Apple’s inclusion of citations related to any claim preamble in this claim chart should not be interpreted as an admission that the preamble is limiting. Apple reserves the right to take the position that the claim preambles are limiting or not limiting on a claim-by-claim basis.

HIGHLY CONFIDENTIAL – OUTSIDE ATTORNEYS’ EYES ONLY – SOURCE CODE

memory;	The Samsung Galaxy S II Skyrocket phone contains a memory. For example, the Samsung Galaxy S II Skyrocket contains a computer readable storage medium including ROM and RAM, such as internal memory with a capacity of 16GB. (See Samsung Galaxy S II Skyrocket specifications, http://www.samsung.com/us/mobile/cell-phones/SGH-I727MSAATT-specs).
one or more processors; and	The Samsung Galaxy S II Skyrocket phone contains one or more processors. For example, the Samsung Galaxy S II Skyrocket contains a 1.5 GHz dual-core processor. (See Samsung Galaxy S II Skyrocket specifications, http://www.samsung.com/us/mobile/cell-phones/SGH-I727MSAATT-specs).

HIGHLY CONFIDENTIAL – OUTSIDE ATTORNEYS’ EYES ONLY – SOURCE CODE

<p>one or more programs stored in the memory and configured for execution by the one or more processors, the one or more programs including instructions for:</p>	<p>The Samsung Galaxy S II Skyrocket phone contains one or more programs stored in memory and configured for execution by the one or more processors. For example, the Samsung Galaxy S II Skyrocket stores and executes a version of the Android operating system (for example, the Operating System Android version 2.3.5, Gingerbread) and one or more application programs. (See Samsung Galaxy S II Skyrocket specifications, http://www.samsung.com/us/mobile/cell-phones/SGH-I727MSAATT-specs).²</p>
---	--

² Every Samsung Galaxy S II Skyrocket phone model and software release comprises one or more programs stored in the memory and configured for execution by the one or more processors, the one or more programs including instructions that implement the accused functionality. [REDACTED]

HIGHLY CONFIDENTIAL – OUTSIDE ATTORNEYS’ EYES ONLY – SOURCE CODE

displaying a list of interactive items for missed telephone calls, wherein each item in the list of interactive items includes a first interactive displayed portion and a second interactive displayed portion distinct from the first interactive displayed portion;

The Samsung Galaxy S II Skyrocket phone contains one or more programs with instructions for displaying a list of interactive items for missed telephone calls, wherein each item in the list of interactive items includes a first interactive displayed portion and a second interactive displayed portion distinct from the first interactive displayed portion.

For example, the following screenshot taken on a Samsung Galaxy S II Skyrocket phone displays a list of interactive items comprising missed telephone calls. Each item in this list includes a first interactive displayed portion (the left square area with a silhouette icon) and a second interactive displayed portion (the remaining portion of the entry containing the name and phone number).

The Samsung Galaxy S II Skyrocket phone implements the accused functionality as described above using instructions [REDACTED]

<p>displaying a list of items, the list comprising a plurality of interactive displayed items associated with telephone calls, wherein at least one interactive displayed item in the list is associated with a missed telephone call and is also associated with contact information stored in the portable electronic device, and</p>	<p>The Samsung Galaxy S II Skyrocket phone contains one or more programs with instructions for displaying a list of items, the list comprising a plurality of interactive displayed items associated with telephone calls, wherein at least one interactive displayed item in the list is associated with a missed telephone call and is also associated with contact information stored in the portable electronic device.</p> <p>For example, the following screenshot taken on a Samsung Galaxy S II Skyrocket phone displays a list of interactive displayed items associated with missed telephone calls and contact information stored in the device.</p>

HIGHLY CONFIDENTIAL – OUTSIDE ATTORNEYS’ EYES ONLY – SOURCE CODE

	 <p>The Samsung Galaxy S II Skyrocket phone implements the accused functionality as described above using instructions [REDACTED]</p>
<p>wherein each such interactive displayed item associated with both a missed telephone call and contact information comprises at least a first interactive displayed portion and a second interactive displayed portion, the second interactive displayed portion being distinct from the first</p>	<p>The Samsung Galaxy S II Skyrocket phone contains one or more programs with instructions for displaying a list of interactive displayed items associated with missed telephone calls and contact information, wherein each item comprises at least a first interactive displayed portion and a second interactive displayed portion, the second interactive displayed portion being distinct from the first interactive displayed portion.</p> <p>For example, the following screenshot taken on a Samsung Galaxy S II Skyrocket phone displays a list of interactive items associated with missed telephone calls and contact</p>

HIGHLY CONFIDENTIAL – OUTSIDE ATTORNEYS’ EYES ONLY – SOURCE CODE

<p>interactive displayed portion;</p>	<p>information. Each item in this list includes a first interactive displayed portion (the left square area with a silhouette icon) and a second interactive displayed portion (the remaining portion of the entry containing the name and phone number).</p>  <p>The Samsung Galaxy S II Skyrocket phone implements the accused functionality as described above using instructions [REDACTED]</p>
<p>detecting a finger tap input at a first user selected interactive displayed item associated with both a missed telephone call and contact information,</p>	<p>The Samsung Galaxy S II Skyrocket phone contains one or more programs with instructions for detecting a finger tap input at a first user selected interactive displayed item associated with both a missed telephone call and contact information, wherein the finger tap input is with the first interactive displayed portion of the selected interactive displayed</p>

HIGHLY CONFIDENTIAL – OUTSIDE ATTORNEYS’ EYES ONLY – SOURCE CODE

wherein the finger tap input is with the first interactive displayed portion of the selected interactive displayed item, and immediately in response to that input initiating a telephone call to a telephone number associated with the first user selected interactive displayed item;

item, and immediately in response to that input initiating a telephone call to a telephone number associated with the first user selected interactive displayed item.

For example, the following screenshot taken on a Samsung Galaxy S II Skyrocket phone is displayed immediately in response to detecting a finger tap and swipe on the silhouette icon corresponding to the missed caller “Annie” and shows the initiation of a return telephone call.

The Samsung Galaxy S II Skyrocket phone implements the accused functionality as described above using instructions [REDACTED]

HIGHLY CONFIDENTIAL – OUTSIDE ATTORNEYS’ EYES ONLY – SOURCE CODE

detecting a finger tap input at a second user selected interactive displayed item associated with both a missed telephone call and contact information, where the finger tap input is with the second interactive displayed portion of the selected interactive displayed item, and immediately in response to that input completely substituting display of the list of interactive items with display of contact information for a caller corresponding to the second user selected interactive displayed item, the displayed contact information including a plurality of contact objects comprising:

The Samsung Galaxy S II Skyrocket phone contains one or more programs with instructions for detecting a finger tap input at a second user selected interactive displayed item associated with both a missed telephone call and contact information, where the finger tap input is with the second interactive displayed portion of the selected interactive displayed item, and immediately in response to that input completely substituting display of the list of interactive items with display of contact information for a caller corresponding to the second user selected interactive displayed item.

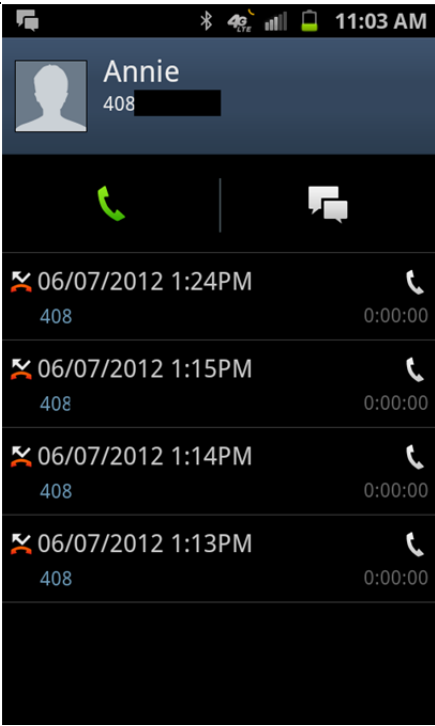

For example, the following screenshot taken from a Samsung Galaxy S II Skyrocket phone is displayed immediately in response to detecting a finger tap input on the name “Annie” of the first missed call entry. This screenshot completely substitutes the interactive missed calls list and displays contact information for the respective missed caller “Annie.”

selected interactive displayed item, and immediately in response to that input completely substituting display of the list of interactive items with display of contact information for a caller corresponding to the second user selected interactive displayed item, the displayed contact information including a plurality of contact objects comprising:

second user selected interactive displayed item.

For example, the following screenshot taken from a Samsung Rugby Pro phone is shown immediately in response to detecting when a user taps with her finger the name “Annie” of the first missed call entry. The screenshot completely substitutes the interactive missed calls list and displays contact information for the respective missed caller “Annie”.

The Samsung Rugby Pro phone implements the accused functionality as described above using instructions [redacted]

HIGHLY CONFIDENTIAL – OUTSIDE ATTORNEYS’ EYES ONLY – SOURCE CODE

a first contact object associated with a telephone number for contacting the caller, and

The Samsung Rugby Pro phone contains one or more programs with instructions for displaying contact information with a first contact object comprising a telephone number associated with the caller.

For example, the following screenshot taken from a Samsung Rugby Pro phone displays the contact information for the missed caller “Annie” and includes a contact object associated with her return telephone number.

The Samsung Rugby Pro phone implements the accused functionality as described above using instructions [REDACTED]

HIGHLY CONFIDENTIAL – OUTSIDE ATTORNEYS’ EYES ONLY – SOURCE CODE

a second contact object associated with a non-telephonic communication modality for contacting the caller; and

The Samsung Rugby Pro phone contains one or more programs with instructions for displaying contact information with a second contact object associated with a non-telephonic communication modality for contacting the caller.

For example, the following screenshot taken from a Samsung Rugby Pro phone displays the contact information for the missed caller “Annie” and includes a contact object with a yellow text bubble icon associated with a non-telephonic communication modality for contacting her, specifically SMS.

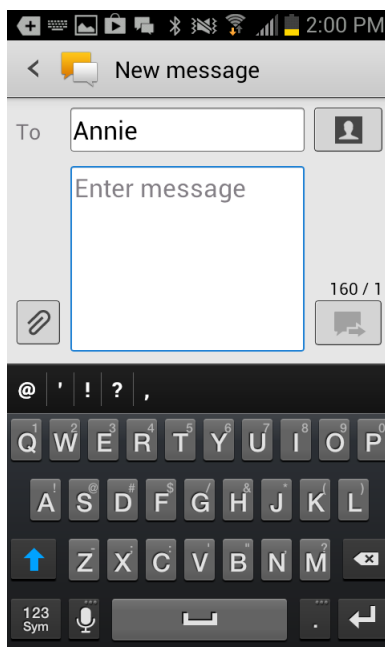

The Samsung Rugby Pro phone implements the accused functionality as described above using instructions [REDACTED]

call and contact information, where the finger tap input is with the second interactive displayed portion of the selected interactive displayed item, and immediately in response to that input completely substituting display of the list of interactive items with display of contact information for a caller corresponding to the second user selected interactive displayed item, the displayed contact information including a plurality of contact objects comprising:

with the second interactive displayed portion of the selected interactive displayed item, and immediately in response to that input completely substituting display of the list of interactive items with display of contact information for a caller corresponding to the second user selected interactive displayed item.

For example, the following screenshot taken from a Samsung Transform Ultra phone is displayed immediately in response to detecting when a user taps with his finger the rectangular area of the first missed call entry. This screenshot completely substitutes the interactive missed calls list and displays contact information for the respective missed caller “Annie.”

The Samsung Transform Ultra phone implements the accused functionality as described above using instructions [REDACTED]
